Technical Bulletin

Installation: CL7000 incorrect wiring information

THE INSTALLER COULD CONNECT THE EARTH WIRE TO THE WRONG POSITION, BEING MISLEAD BY THE FIGURE IN THE INSTALLATION MANUAL.

When installing a CL7000 AC unit, there is an incorrect wiring diagram in the installation manual (Fig1).

Fig1.

Please see below in Fig2 the correct terminal for the earth wire connection.

Fig2.

The correct method is shown on the inside of the case on the indoor unit shown in fig3 and fig4.

Fig3.

Fig4.

The indoor unit power supply cable must be connected according to the wiring diagram which is available on the backside of the front panel.

The next manual release will be updated with this information.

Whilst it is always our intention to fully assist, it is essential to recognise that all information given by the company in response to an enquiry of any nature is provided in good faith and based upon the information provided with the enquiry. We recommend that advice should always be checked with your installer or contract partner. Consequently, the company cannot be held responsible for any liability relating to the use or repetition of such information or part thereof. In addition, whilst making every reasonable effort to monitor the performance and quality of our supply, installation and service network, we do not accept responsibility for the workmanship or operation of any third party company that the company may have promoted either in conversation, e-mail, or other communication. Similarly, the views and opinions expressed in communication with individuals within the company may not reflect that of the business as a whole.
