

BOSCH

Bosch **EasyControl**

Smart heating and hot water control made **Easy**

Easy on the eye

The wall-mounted controller has a modern, sleek design, making it a stylish addition to any home. Available in black or white, it can either stand out or blend in with any décor.

Have you ever wanted to heat your house before you get home?
Perhaps you've wanted to turn off the heating in an unused room?
Or check your energy usage from your phone?

Do it the Easy way!

The new smart internet-connected heating and hot water thermostat from Bosch makes everything easy and gives you complete control.

Achieving the perfect environment has never been so easy – you can decide the times, temperatures and which rooms you want to heat, all from your smart device, wherever you are.

Or, let the EasyControl take over, sensing your presence and anticipating your routines, saving energy when you're out and about while ensuring the house is warm for when you return.

What's more, it's the only smart internet-connected thermostat engineered specifically for Worcester's award-winning boiler range.

By installing a Bosch EasyControl with any of Worcester's award-winning combi boilers, it will also be compliant with the new Boiler Plus legislation.

Zonal control made Easy

With the EasyControl and Bosch Smart Radiator Thermostats (Smart TRVs) you can easily control the heating in each individual room to give maximum comfort when and where you want it.

So if you prefer sleeping at 17.5°C, but would like to step into a warm bathroom at 7am, simply set your desired temperature via the EasyControl app. An integrated sensor will continuously monitor the room temperature to keep it at your desired level. Several time-controlled settings are possible per day, and you can also set different times for every day of the week. After all, even early-risers stay in bed longer on Sundays!

Easy to get started

The EasyControl can be purchased on its own or together with three Smart TRVs as a starter pack. Extra Smart TRVs are also available to purchase for when you want to extend your heating system.

Intelligent heating that's Easy to adapt

EasyControl incorporates home sensing technology to maximise comfort and efficiency, while minimising costs.

Home presence detection

You'll never need to worry about turning the heating down again when you leave home as the EasyControl can do it for you.

Using the latest technology, the thermostat automatically turns the heating down when you're not in the house, while turning the heating up to your desired temperature when you're returning home.

Home sensing can be activated or deactivated at any time. By switching it off, your heating system will return to your original timing schedule.

For security and peace of mind, all data is stored on the EasyControl, ensuring no information is shared with other parties.

Welcome back

Programmable hot water

When installed with a compatible boiler, domestic hot water can be programmed, monitored and controlled via the app, so that you have hot water when you need it, while saving you energy when you don't.

Designed with Worcester and Bosch boilers in mind

The wall-mounted controller communicates seamlessly with your Worcester boiler by using the same communications protocol, which means it can give more complex instructions than simple stop/start, on/off operations. By having fine control of the boiler's output, instead of on and off, the boiler is more efficient – meaning the EasyControl saves you money.

Easy to use

Visit worcester-bosch.co.uk/easy for more information

Using the EasyControl couldn't be easier, thanks to its simple-to-understand displays and its intuitive app. Settings can be manually overridden via the wall-mounted controller or via the app, giving precise and immediate comfort control.

EasyControl features a colourful Ambi light that shows you what your heating is doing at a quick glance.

What's more, the Easy Control is designed to help you effectively monitor your heating and hot water use. The app gives you easy-to-understand graphs on your gas consumption for heating and hot water – it even has the ability to include current gas prices to give you accurate and up-to-date estimates of heating and hot water costs.

Superior energy rating

The EasyControl boosts the heating system's ErP rating by 5% with a minimum of three Bosch Smart TRVs, or 4%* without Smart TRVs, earning your overall system a better ErP energy classification and saving you money.

*With weather compensation enabled.

Easy to install

Installing the EasyControl is simple. The device can be mounted to the wall and connected to the boiler using a 2-core cable. After checking the connection to the internet, the set-up can be completed by following the steps in the EasyControl app.

Boiler compatibility

The EasyControl has been designed specially to communicate with Worcester combi and system boilers but it can also be used with a number of other manufacturers' products.

Using the EasyControl adapter allows compatibility with OpenTherm protocols and boilers with a 230v room thermostat connection.

*System boilers with an integral diverter valve – provided optional integral diverter valve is installed.

^Manufactured after February 2011.

**Correct at time of printing. For the latest list of compatible boilers see the website.

Complies with Boiler Plus

As an added benefit when installing a replacement combi boiler, fitting an EasyControl means the system will meet the requirements of the Boiler Plus legislation. The EasyControl does not just meet one of the four minimum requirements, unlike most controls, but in fact complies with three!

Using local internet weather data, rather than a wired external sensor, the EasyControl automatically responds to changes in temperature and adjusts your heating to ensure your home is always at the optimum comfort level.

First point of call

Installers can add their contact details into the consumer's device so they will be the first to get a call when it is time for the heating system to be serviced or in the unlikely event there are any issues.

Clip off, clip on

For added convenience, the EasyControl uses the same wall bracket as the Worcester Wave controller, making it an easy clip off, clip on installation for customers who want to upgrade.
